Dear Carl

Following our recent meeting I would like to thank you and your colleagues for all the support and sound advice that you have provided to my staff and myself on a number of schemes over the recent years.

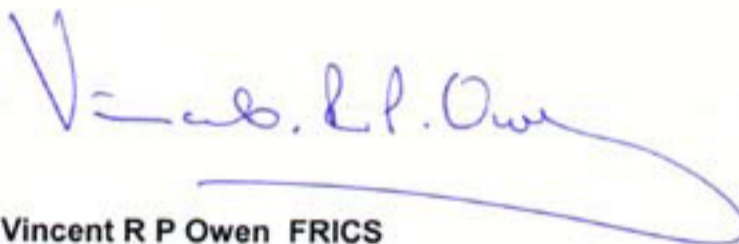

We have found your quantity surveying advice extremely professional and invaluable, particularly when preparing initial viability studies, by providing budget estimates for numerous schemes together with assistance in appraising tenders and also providing Post Contract cost control duties on numerous Design and Build projects. Your services have permitted us to concentrate on our core strengths and have been well appreciated, not only by this office, but also our Clients.

In addition to the above, thank you for the expertise you have provided when preparing Fire Insurance Reinstatement Cost and Assessment, particularly on the more complex and unusual buildings contained within a number of our clients portfolios.

Once again I thank you for your excellent professional support.

Kind regards

Yours sincerely

**Vincent R P Owen FRICS**
